

Sim City Rounds: U of T Simulation

Advancing Patient Care and Excellence Through Simulation-Based Practices: Harnessing Technology and AI

Speaker: Jabeen Fayyaz MD, FCPS, MCPS, DCH, CHSE, MHPE, Ph.D.

Moderator: Dr. Petal S. Abdool

Learning Objectives:

- Understand how simulation-based practices can be effectively applied to enhance patient safety and drive quality improvement initiatives.
- Demonstrate the ability to translate simulation-based insights into practical interventions that drive measurable improvements in patient care and clinical excellence.
- Analyze the role of advanced technologies, including artificial intelligence, in enhancing the effectiveness and efficiency of simulation-based training and patient care practices.
